

TechDiges tantII Dispenser

Odor Control Dispensing System

The TechDiges tantII Dispenser combines all the required features for the odor control system with advanced, yet easy to use features such as a digital programming display, multiple chemical pump options, quick change pumps, and a quick service battery pack with low battery alerts. Trapper is easily adaptable for odor suppression and deodorizing needs with a quick programming change and part swap.

Features and Benefits:

- Common sense, easy to understand with digital programming.
- 24/7 battery monitor with low battery warning.
- Water resistant components for under counter and low wall installations.
- Plug-n-go electrical hookup for quick and easy connect/disconnect.
- Tool-less quick change pump.
- Fast snap mounting bracket to quickly remove/reattach unit from wall for preventative maintenance.
- Easy switch between odor suppression and drain maintenance modes through simple programming.
- Odor suppression model uses a brass nozzle with a configurable spray pattern for stream to mist adjustments, becoming Trapper Odor Control.

The dispenser is available with three primary configuration options

- Drain or odor control.
- AC wall power (115/230VAC) or battery power.
- Three different squeeze tube choices (EPDM, PVC, Viton).
- Pump output: 14 ounces per minute, minimum dose is 1 ounce per minute.
